Water Management Strategies and Adaptation Actions under
a Global Change Context for the Mediterranean Region

WATER4MED

01 June 2024 – 31 May 2027

About the Project

The WATER4MED project aims to develop innovative solutions for water management in the Mediterranean region, focusing on adaptation to increasing climate change challenges.

Our goal is to improve water governance models and propose solutions for water storage and flood mitigation.

WATER4MED Partners SDG6, 17
