

Ensuring Access to Physical Healthcare Services at Al-Balqa Applied University

Al-Balqa Applied University adopts a comprehensive and integrated approach to ensuring access to physical healthcare services as a fundamental component of student and staff wellbeing, in alignment with the QS Sustainability framework. The university combines on-campus medical support, a structured health insurance system, and an extensive network of accredited healthcare providers across Jordan to deliver accessible, reliable, and high-quality healthcare services.

This model is further strengthened through digital tools such as the medical network platform, which facilitates efficient access to healthcare providers, alongside continuous expansion of partnerships with hospitals and clinics. In parallel, BAU complements direct healthcare provision with preventive and community-oriented health initiatives, including medical outreach, awareness campaigns, and free healthcare services, ensuring a holistic approach to health and wellbeing.

Promoting Physical Well-being through health infrastructure

Al-Balqa Applied University (BAU) is dedicated to promoting the well-being of its students, academic staff, and administrative personnel. Each campus hosts health centers staffed with trained medical professionals who provide first aid, primary healthcare, specialized referrals, and wellness education. These facilities operate throughout the academic week, ensuring access to both routine and emergency care.

The university **Health Insurance Unit** complements these services by providing high-quality, equitable healthcare with transparency and fairness, aligned with BAU's strategic goals. It serves both the university community and the wider society through initiatives such as free medical days, blood donation campaigns, and visits to orphanages and senior care centers.

BAU health units collaborate with the Ministry of Health and local hospitals to ensure secure, reliable, and effective healthcare for all members of the university community. The unit continually updates its services, invests in human resources, and offers student training programs to prepare future professionals with practical skills. Together, these efforts foster a safe, supportive, and sustainable environment that enhances wellness, satisfaction, and institutional excellence.

Improving Health Service Access:

Al-Balqa Applied University (BAU) promotes community wellness through its continuously updated **Medical Network Platform**. This platform offers comprehensive information on accredited healthcare providers across Jordan, helping students and staff access quality medical services. Users can easily locate nearby hospitals, clinics, and medical centers. Through BAU’s electronic portal, students and staff can also submit feedback or complaints regarding medical services, supporting continuous improvement and enhancing user satisfaction across the university community.

Green Spaces and Campus Infrastructure at Al-Balqa Applied University

Al-Balqa Applied University places great emphasis on providing a healthy and safe campus environment. Its expansive green spaces and beautifully landscaped gardens reflect the university's commitment to enhancing the well-being of students, faculty, and staff. Trees and natural vegetation line walkways and courtyards, improving air quality, reducing stress, and promoting a sense of calm and relaxation.

The university also offers fully equipped sports fields and facilities that encourage physical activity and support an active lifestyle. Modern campus infrastructure, including walking paths, outdoor seating areas, and integrated educational and recreational facilities, complements these green spaces. Together, these elements create a sustainable and health-conscious environment that fosters productivity, creativity, and positive community engagement within the campus.

supporting Physical Activity and Well-being through Sports Infrastructure

Al-Balqa Applied University provides a range of sports infrastructure and recreational facilities designed to support physical activity and promote well-being among students, staff, and, in selected cases, the surrounding community. These facilities are complemented by organized sports programs and activities managed through specialized university units, which aim to enhance participation, teamwork, and healthy lifestyles. The university also adopts an inclusive approach by enabling shared use of sports facilities and organizing events that engage both the university community and external participants, strengthening its role in community engagement. These efforts contribute to promoting physical well-being and social interaction, aligning with SDG 3 – Good Health and Well-being and SDG 10 – Reduced Inequalities, while supporting BAU’s broader commitment to sustainability and quality of life.

The following examples illustrate selected sports facilities and recreational spaces at Al-Balqa Applied University that support physical activity, well-being, and inclusive engagement for students, staff, and the wider community.

Sample of Sport Facilities

BAU's Community Health Outreach and Engagement Activity

Students Participate in Community Health Initiative at Al-Karak Hospital

Nursing students took part in a community health initiative at Al-Karak Government Hospital, focusing on the women's health department. The activity aimed to raise health awareness among patients while providing students with practical field experience, strengthening the link between academic learning and community service, and enhancing their professional and social responsibility.

Awareness Lecture on Family Planning and Safe Contraceptive Choices at Al-Karak Government Hospital

Midwifery students delivered an awareness lecture for women at Al-Karak Government Hospital on safe and appropriate contraceptive methods.

Community Health Outreach Activity on Personal Hygiene for Children by Nursing Students at Al-Karak University College

Nursing students conducted a community outreach activity at a local kindergarten and school to promote personal hygiene and health awareness among children. Through interactive and age-appropriate methods, the initiative aimed to instill preventive health practices while strengthening students' practical experience and reinforcing BAU's role in serving and engaging with the local community.

Community Health Outreach Workshop on Cesarean Section Awareness at Al-Karak Government Hospital

BAU organized a community outreach workshop in collaboration with a local hospital to raise awareness about cesarean section procedures and post-operative care. The activity targeted women in the community, providing accessible health education and practical guidance, while strengthening BAU's role in delivering health awareness services beyond the campus.

Community Health Outreach Workshop “Little Nurse” for School Students

BAU organized a community outreach workshop targeting school children to promote basic health awareness and healthy habits. The activity introduced concepts such as personal hygiene and dental care through interactive methods, while also providing basic health assessments, reflecting BAU’s role in delivering early health education and engaging with the local community.

Event for Arab Breast Cancer Awareness Campaign

BAU College hosted a community outreach event to launch the Arab Breast Cancer Awareness Campaign in collaboration with national health partners. The initiative aimed to raise awareness among students and the local community about the importance of early detection and preventive practices, reinforcing BAU’s role in promoting public health awareness and community engagement.

Community Health Outreach Initiative “Know Your Blood Type”

Al-Balqa Applied University implemented a community health outreach initiative in schools to raise awareness about blood types and basic health concepts. The activity included educational sessions and practical testing, engaging students and teachers while promoting early health awareness and preventive knowledge, reflecting BAU’s role in delivering health education services to the local community.

Enhancing Public Health Awareness at BAU through Community Engagement and Preventive Education

BAU organized a health awareness lecture in collaboration with regional scientific and medical organizations, engaging students and the wider community. The activity promoted preventive healthcare, early disease detection, and health education, contributing to improved well-being and strengthening partnerships in health knowledge dissemination

Promoting Student Well-being and Community Engagement at BAU through Intercollegiate Sports Activities

BAU hosted a table tennis championship in collaboration with the university sports federation, engaging students from multiple public and private colleges. The activity promoted physical well-being, teamwork, and positive competition, contributing to good health and well-being and fostering inclusive student engagement and collaboration

Free Medical Outreach Services

BAU, participated in a free medical day serving the local community, with involvement from academic staff and students in health-related disciplines. The initiative provided medical screenings, consultations, and health education, contributing to improved well-being and strengthening community engagement and access to essential health services

Student Participation in Medical Outreach Services

BAU participated in a free medical day engaging students in delivering healthcare support and awareness services to the local community. The initiative provided basic medical screenings, health education, and pharmaceutical guidance, contributing to improved well-being and strengthening community support and access to essential health services

Student Participation in Medical Outreach Services

BAU participated in a free medical day engaging students in delivering healthcare support and awareness services to the local community. The initiative provided basic medical screenings, health education, and pharmaceutical guidance, contributing to improved well-being and strengthening community support and access to essential health services

Collaborative Medical Outreach Initiatives

BAU participated in a free medical day in collaboration with the municipality and community partners, engaging students in delivering healthcare and awareness services. The initiative provided medical screenings and support to local residents, contributing to improved well-being and strengthening community partnerships and access to essential health services

Participation in Cancer Prevention Campaigns

BAU participated in a national awareness campaign on cancer prevention in collaboration with health organizations and community partners. The activity engaged students in promoting healthy lifestyles and preventive practices, contributing to improved public health and well-being (SDG 3) and strengthening community awareness and engagement (SDG 10).

BAU Knowledge Exchange Initiative: International Scientific Engagement Strengthening Research and Community Impact

BAU contributed to international knowledge exchange by participating in a specialized scientific seminar at Cairo University on body engineering. The engagement facilitated collaboration with researchers and academics, promoting the application of scientific knowledge to health and community development.

BAU Knowledge Exchange Initiative: Community Health Outreach through Blood Donation Campaign

BAU delivered a community health outreach initiative by organizing a blood donation campaign in collaboration with the national blood bank. The activity engaged students and staff in supporting local healthcare needs, reinforcing social responsibility and community partnership.

BAU Knowledge Exchange Initiative: Delivering Community Health Outreach through Free Medical Services.

BAU contributed to community outreach by participating in a free medical day at a local school. The initiative engaged students in delivering health awareness and basic assessments, supporting community well-being and strengthening practical knowledge exchange with the local community.

Advancing Community Health Awareness through Breast Cancer Outreach

BAU delivered a community health outreach initiative by organizing an awareness day on breast cancer in collaboration with a national health organization. The event engaged students, staff, and the local community through education, early detection awareness, and on-site screening support.

Enhancing Community Safety and Health Awareness through Civil Defense Outreach

BAU delivered a community outreach initiative by hosting a public awareness campaign in collaboration with Civil Defense. The event engaged students and the local community through safety education, emergency response demonstrations, and basic health screenings.

Community Health Outreach Blood Donation Campaign

Al-Balqa Applied University organized a community health outreach blood donation campaign in partnership with national healthcare institutions, engaging students, staff, and the wider community. The initiative aimed to support national blood banks, raise awareness of voluntary blood donation, and contribute to saving lives, reflecting BAU's role in strengthening healthcare support and promoting social responsibility through community engagement.

Lecture on Breast Cancer and Personal Hygiene in Schools

Al-Balqa Applied University delivered a community health outreach lecture in a local school focusing on breast cancer awareness, early detection, and personal hygiene practices. The initiative engaged school students through health education and preventive guidance, supporting the dissemination of health knowledge within the community and reinforcing BAU's role in promoting public health awareness beyond the campus.

Participation in Pink October Breast Cancer Awareness Campaign

BAU participated in a community health outreach event organized in collaboration with local health authorities to promote breast cancer awareness during the Pink October campaign. The initiative included educational sessions, awareness activities, and community engagement programs aimed at encouraging early detection and preventive health practices, reflecting BAU's commitment to supporting public health awareness at the community level.

Community Health Outreach Blood Donation Campaign at Al-Balqa Applied University

BAU organized a community health outreach blood donation campaign in collaboration with the national blood bank and relevant university units, engaging students, staff, and community participants. The initiative aimed to support national healthcare needs, promote voluntary blood donation, and strengthen social responsibility, reflecting BAU's role in contributing to community health and lifesaving services.
