Faculty of Medicine Participation in an International Training Workshop on Clinical Educator Capacity Building in Greece

Health Awareness Day on Early Detection of Breast Cancer (Pink October Campaign) at Al-Balqa Applied University

Community Development and Local Service Unit, in Cooperation with the Faculty of Medicine, Organizes an Awareness Day on the Importance of Early Detection of Breast Cancer

Advancing Clinical Nutrition: BAU Hosts the Jordanian Conference on Insulin Resistance and Integrated Health Management

Free Medical Day at BAU Held under the Patronage of the University President

BAU–UNHCR Higher Education Alliance for Refugee Students

Building on Al-Balqa Applied University's existing cooperation with UNHCR to support refugee students

and facilitate their access to higher education, BAU proposes expanding its refugee-support activities through a dedicated health and well-being outreach initiative involving the Faculty of Medicine, Faculty of Nursing, and Faculty of Allied Medical Sciences. The initiative would provide refugee students with preventive-health education, basic health screening, nutrition and healthy-lifestyle awareness, women's and reproductive health education, mental well-being awareness, early-disease detection, rehabilitation guidance, and referral to appropriate healthcare services.

Proposed initiative: Health and Well-being Outreach Program for International, Refugee and Migrant Students

Al-Balqa Applied University, through its Faculty of Medicine, Faculty of Nursing, and Faculty of Allied Medical Sciences, could deliver targeted health and well-being outreach programs for refugee and migrant communities. The initiative could combine the expertise of the three faculties to provide preventive-health education, basic health screening, nutrition and healthy-lifestyle awareness, women's and family health education, mental well-being awareness, early-disease detection, laboratory-health awareness, rehabilitation-related guidance, and referral information for appropriate healthcare services. The Faculty of Medicine could contribute to medical consultations, disease-prevention and early-detection awareness, health assessment and referral guidance. The Faculty of Nursing could lead community nursing, hygiene, first aid, maternal and family health, health education and basic screening activities. The Faculty of Allied Medical Sciences could contribute through its relevant specialties to laboratory-health awareness and screening, nutrition, rehabilitation and other allied-health services, depending on the participating departments.

Initiative – Community Inclusion and Empowerment of Persons with Disabilities

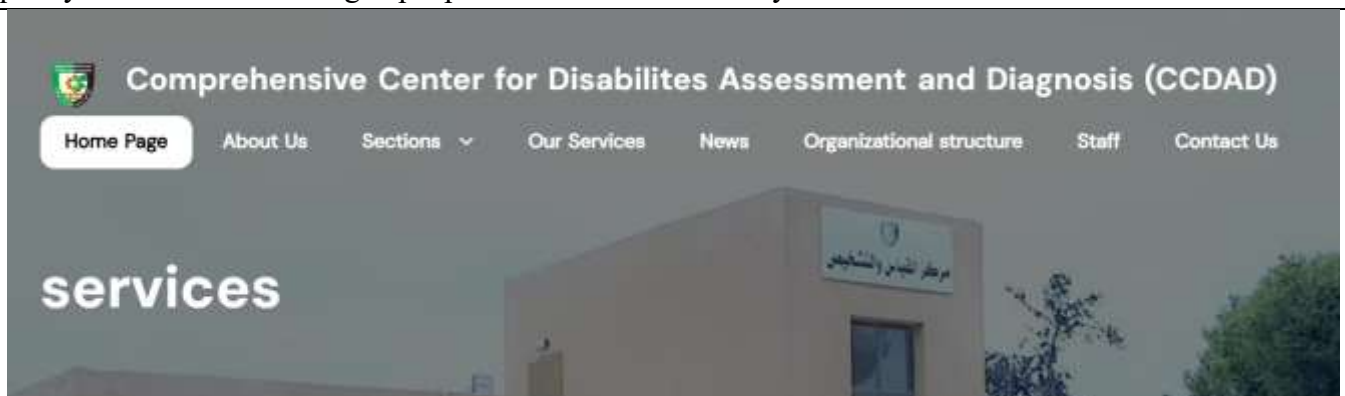

Ma'an University College launched a series of community activities through a field visit to Al-Shifa Center for Consultation and Training, specifically aimed at community inclusion and empowerment of persons with disabilities.

BAU–Princess Taghrid Institute Cooperation to Support Rehabilitation and Community Services for Persons with Disabilities

Al-Balqa Applied University cooperates with the Princess Taghrid Institute to deliver community-oriented services supporting persons with disabilities and other vulnerable groups. The cooperation includes diagnosis, rehabilitation, specialized training, and community-based support, connecting BAU's academic and professional expertise with services that promote the health, well-being, rehabilitation, inclusion, and quality of life of disadvantaged people in the local community.

Comprehensive Measurement and Diagnosis Center – Community Support for Persons with Disabilities

Al-Balqa Applied University, through its Comprehensive Measurement and Diagnosis Center, delivers specialized outreach and support services for persons with disabilities, children, and their families in the local community. The Center provides psychological and educational assessment, comprehensive diagnosis, psychological counseling, and emotional and behavioral support, alongside guidance for families and capacity-building for professionals working with persons with disabilities. These services

extend BAU's expertise beyond academic education to directly support the mental health, well-being, rehabilitation, inclusion, and quality of life of disadvantaged people, demonstrating BAU's delivery of health and well-being outreach to the local community in alignment.

BAU Participation in Community Coordination to Improve Services for Persons with Disabilities

Al-Balqa Applied University participates in community-based coordination with governmental institutions, civil-society organizations, and specialized stakeholders to improve services and support for persons with disabilities in the local community. Through its Comprehensive Measurement and Diagnosis Center, BAU contributes professional and specialized expertise to initiatives aimed at strengthening appropriate services, family and community support, rehabilitation, inclusion, and the well-being of persons with disabilities. This community engagement helps connect persons with disabilities and their families with relevant support networks and promotes coordinated responses to their needs, demonstrating BAU's outreach to disadvantaged groups and its contribution to improving health and well-being outcomes

Career Development Center Organizes Awareness Workshop on Welding Technology at Al-Karak University College

A specialized awareness workshop was organized for students of Welding Technology to highlight the importance of the field and its relevance to labor market needs. The session emphasized the role of modern equipment, advanced training, and qualified academic staff in preparing students with practical and theoretical skills, supporting employability and workforce readiness in the local and regional context.

Nursing Students from Al-Karak University College Participate in Community Health Initiative at Al-Karak Government Hospital

Nursing students took part in a community health initiative at Al-Karak Government Hospital, focusing on the women's health department. The activity aimed to raise health awareness among patients while providing students with practical field experience, strengthening the link between academic learning and community service, and enhancing their professional and social responsibility.

Awareness Lecture on Family Planning and Safe Contraceptive Choices at Al-Karak Government Hospital

Midwifery students from Al-Karak University College delivered an awareness lecture for women at Al-Karak Government Hospital on safe and appropriate contraceptive methods. The session aimed to improve health awareness, clarify misconceptions, and support informed decision-making, while enhancing students' practical experience and strengthening community engagement in women's health.

Community Health Outreach Activity on Personal Hygiene for Children by Nursing Students at Al-Karak University College

Nursing students conducted a community outreach activity at a local kindergarten and school to promote personal hygiene and health awareness among children. Through interactive and age-appropriate methods, the initiative aimed to instill preventive health practices while strengthening students' practical experience and reinforcing BAU's role in serving and engaging with the local community.

Community Outreach Visit by Nursing Students to Pediatric Department at Al-Karak Government Hospital

Nursing students carried out a community outreach visit to the pediatric department at Al-Karak Government Hospital, engaging with children and supporting their emotional wellbeing through interactive activities. The initiative reflects BAU's commitment to community service by promoting compassionate care, strengthening student engagement with healthcare environments, and contributing positively to the local community.

Community Outreach Initiative Using AI and Virtual Reality in Physical Education (EduMotion VR) at Al-Karak University College

Al-Karak College launched the EduMotion VR initiative as a community outreach effort to integrate artificial intelligence and virtual reality into physical education. The initiative supports innovative learning approaches and extends educational benefits to the wider community, reflecting BAU's commitment to enhancing teaching practices, promoting technological awareness, and contributing to community-oriented educational development.

Community Health Outreach Workshop on Cesarean Section Awareness at Al-Karak Government Hospital

Al-Karak University College organized a community outreach workshop in collaboration with a local hospital to raise awareness about cesarean section procedures and post-operative care. The activity targeted women in the community, providing accessible health education and practical guidance, while strengthening BAU's role in delivering health awareness services beyond the campus.

Community Health Outreach Workshop “Little Nurse” for School Students at Al-Karak University College

Al-Karak University College organized a community outreach workshop targeting school children to promote basic health awareness and healthy habits. The activity introduced concepts such as personal hygiene and dental care through interactive methods, while also providing basic health assessments, reflecting BAU’s role in delivering early health education and engaging with the local community.

Community Outreach Launch Event for Arab Breast Cancer Awareness Campaign at Al-Karak University College

Al-Karak University College hosted a community outreach event to launch the Arab Breast Cancer Awareness Campaign in collaboration with national health partners. The initiative aimed to raise awareness among students and the local community about the importance of early detection and preventive practices, reinforcing BAU’s role in promoting public health awareness and community

engagement.

Community Engagement Sports Event: Football Championship Final

Al-Karak University College organized a football championship final as part of its community engagement activities, promoting physical wellbeing and social interaction among participants. The event brought together students and attendees in a shared sports environment, reflecting BAU's role in encouraging active lifestyles and fostering a sense of community through inclusive recreational activities.

Community Engagement Industrial Visit to Bromine Production Facility by Al-Balqa Applied University Students

Al-Balqa Applied University organized a community engagement industrial visit for students to a national bromine production facility, providing direct exposure to real industrial processes and safety practices. The visit included technical briefings and field tours led by industry experts, strengthening the connection between academic learning and industry needs, and reflecting BAU's role in preparing students to contribute effectively to the local economy and community development.

Community Health Outreach Initiative “Know Your Blood Type”

Al-Balqa Applied University implemented a community health outreach initiative in schools to raise awareness about blood types and basic health concepts. The activity included educational sessions and practical testing, engaging students and teachers while promoting early health awareness and preventive knowledge, reflecting BAU’s role in delivering health education services to the local community.

Enhancing Public Health Awareness at BAU through Community Engagement and Preventive Education

Al-Balqa Applied University, through Zarqa University College, organized a health awareness lecture in collaboration with regional scientific and medical organizations, engaging students and the wider community. The activity promoted preventive healthcare, early disease detection, and health education, contributing to improved well-being and strengthening partnerships in health knowledge dissemination.

Promoting Inclusion and Equal Opportunities at BAU through Community Engagement for Persons with Disabilities

Al-Balqa Applied University, through Zarqa University College, organized an awareness day engaging students, experts, and community stakeholders to promote inclusion and empowerment of people with disabilities.
